Lacombe Automotive Dealerships

Re: Electronic Surveillance of Local Dealerships

As you are all well aware the Lacombe Police Service has recently undertaken a more proactive approach to try and curb the continuing problem of theft from our local dealerships during the evening hours.

Recently the Lacombe Police Service and The Surveillance Shop attended to all the local dealerships with what the service believes is an innovative solution to an ongoing problem. Lacombe Police believes that with the combination of today's technology and our local police service we can address the problem of thefts from the dealership lots.

Upon attending The Surveillance Shop then came up with a proposal for surveillance equipment that I believe in combination with our service will stop these needless thefts from taking place. The fact that when someone enters a lot at night and the minute they do it will be brought to the attention of our communication centre with live monitoring. At this point the staff will then be able to determine the intension of the nighttime visitors.

Other benefits to this is once an Insurance Company knows of our proactive approach that we have undertaken where hoping that it will have a significant impact on the cost of your insurance premiums.

In closing I hope that you would consider this innovative solution and with success the start of having other businesses in our community come on board.

Serving you faithfully,

Chief Gary William Leslie
Lacombe Police Service
